I do not know of anything that will do it better than protection, for it is a proud fact in American history that in all the years, at least for the most part, under which we have had a protective tariff, we have always had ample revenues to conduct the expenses of the government. The man who has money wants that money to be earning something, and the only reason he does not put it out now is because he is afraid he will never get it back or get it back in a de-preciated currency. And when he does not put it out and it does not circulate, then there is no work. When you have idla

General Palmer was cheered repeatedly

by those present, most of whom arose to

Democratic convention only in that it had frequently heartily applauded. He remarked that he would not discuss the attacks made against the right of the United States to enforce its own laws, but would talk about the currency question. "Mr. Bryan proposes," said he, "to add to the currency already in circulation, by the coinage of silver. Unless the free-silver men can make a dollar, under their free-coin-age act, of equal acceptability with our present money, all the other money will disappear, and you will have as currency only the money provided by free coinage. Whatever free coinage fails to add to the 47 cents that the standard silver dollar is now worth above its bullion value will a public loss of over \$430,000,000 no in circulation. Mr. Bryan claims th under free coinage silver and gold will meet at some point and that that will be the standard. But nobody has ever been able to say where that point is.
"People talk about a 53-cent dollar. I do not know whether it would be a 53-cent dollar or a 60-cent dolar, and I know as much about it as anybody. (Applause.) Now, what would be the value of the silver dollar when not maintained by the pledge of the government? The governver dollars at full value, and I have a right to demand that the government keep good faith with me in this silver dollar; and the government will do it, unless it is deprived of the power to do it. Generals' train arrived at Michigan City at 11:45 a. m. The war veterans were met by an enthusiastic crowd of voters at ing at least 4,000, who were attentive listeners to what the Generals had to say. During their short speeches they were often interrupted by applause. Some enthusiastic voter asked General Sickles who he intended to vote for. His answer was, "For Major McKinley." This brought forth rounds of applause. General Sickles was introduced by General Alger, who acted as chairman, and he made the principal address. Although he had always been a Democrat, he was now performing a patriotic duty in upholding the cause of McKinley and sound money, and he appealed to those soldiers and laboring men who had heretofore held the same views as himself to throw aside party considerations and vote for sound money and the Nation's honor. Special to the Indianapolis Journal. MINNEAPOLIS, Minn., Oct. 12.-Candidate Bryan made a "holy show" of himself to-day by riding from St. Paul to this city Bryan, who spent Sunday with her husband, accompanied him from the lesser twin city. Four speeches were made here tonight by the Popocratic nominee, including the much advertised one to "ladies only." to say about Archbishop Ireland's caustic letter, but Mr. Bryan probably thought discretion was the better part of valor in this case, and he let the gifted prelate alone, Good-sized crowds were in attendance at Exposition Hall, the Lyceum Theater, Bridge Square and Yale Place, where the speeches were made. The Popocratic committee, through alleged laboring men, presented Mr. Bryan with a 16-to-1 ink stand, made of sixteen parts of silver and one of gold. In his speech at Exposition Hall Mr.

"Laboring men, I want to ask you why it is that every gold bug says you are selfish and that you are interested by selfish considerations, while every gold but pretends to be a philanthropist and simply these gold bugs are so sure that everybody else will be influenced by their own interest and so positive that personal interests cannot affect them. Why is it, my friends? I will tell you why. If a man believes a thing is good for himself and also good for others, he will admit it is good for himself. If he thinks a thing is good for himself and bad for others he will never is a rule that I will lay down and you can examine it and apply it to everyday life, and you will find that men never deny that a thing is good for them if they also be-lieve it is good for others. It is only when they believe that they prosper by others' adversity that you hear them standing up and denying that they have any pecuniary

"You ask one of those great financiers why he is in favor of the gold standard. You never heard one of them say it. What it is that they say? Why, the financier says he is in favor of the gold standard because it is good for the farmer, because it is good for the business man, and you tell him that the laboring man and the business man and the farmer, all these are willing to risk bimetallism, and what does he say? He rises up to the full height of his moral stature and he says: Shall I let them gold standard down their throats whether they want it or not, because I love them better than I love myself.' I challenge you to find in six thousand years of recorded history a single page that will prove that because a man owns money and loans ney he has been purged of the dross of

"There is this difference between the Recrats who go from us. The Democrats who go from us have to go down on their knees and beg pardon of John Sherman for all the bad words the Democratic party has spoken against him, while the Republicans who come to us come bringing in their hands the Republican platform which was adopted in this hall four years ago. That platform begins the money plank in this way: "The American people, from tradition and interest, favor lism.' Do traditions change in four years? No, my friends, you can't change traditions in that time. Do the interests of the people change in four years? No, their interests are the same now that they were four years ago, and if the Republican party declared four years ago that the American people from tradition and interests. American people from tradition and interest favored the gold standard, those Recst layored the gold standard, those Republicans have a right to stand there to-day, even though the Republican party shall retreat from its position and go across the ocean to find inspiration.

"There is another difference between those Republicans who come to us and the

Democrats who go from us. Show me a Republican who comes to us and I will show you a man who will get up before any audience and tell it the road by which he Show me a Democrat who went from us and I will show you a man who never gives the real reasons why he was dragged out of the Democratic party. The Republicans who come to us come with nothing to conceal and are perfectly willing to tell where they stand and why they stand there, and they are among the most zealous recruits we have. Those who go from us are only able to say in explanation of their conduct that if we had the free coinage of silver it would be awful, awful. My friends, there are reasons for bloods like. friends, there are reasons for bimetallism, and those reasons are so plain and simple that they can be understood, and when we preach bimetallism we give our reason for

"We are told that all we need is confi-dence, confidence. My friends, this confi-dence idea is not a new one. It is at least eighteen hundred years old. I was reading in the Bible these words, which rebuked the same kind of confidence that we have preached to-day:

'If a brother or sister be naked or destitute and one of you say unto them depart in peace; be ye warmed and fed notwith-standing you give them not those things which are needful to the body, what doth

it profit? You tell them that the laborer is idle

in the street because the gold standard has made it more profitable to heard money than it is to employ labor in developing the resources of the country, tell them that these men are naked and hungry and what do they say? They say: Be ye fed and clothed without giving them anything to eat or to put on. Tell them that the farmer has been finding his prices falling when he sold his product without his taxes and debts and fixed charges falling. Tell these people that the farmer has reached a point where his income from his farm is not more than sufficient to pay his debt and his taxes and his fixed charges. Tell and his taxes and his fixed charges. Tel him those falling prices have extinguished his living expenses and he is poor and naked and they say to the farmer be clothed and fed without giving him any-thing to wear or eat. They preach and should be rebuked as those were rebuked 1,800 years ago. They are preaching confidence as the only relief to this country, but we are preaching a doctrine that gives a foundation for confidence to rest upon. "When money goes up, property comes down. A dollar cannot buy more property unless property sells for less. A dollar is the creature of law. When we talk about legislation in regard to money our opponents tell us that commerce regulates all
